

## **IN THE SPECIFICATION**

### **Kindly amend the Specification with the following:**

In the last paragraph on page 9 through the first paragraph on page 10:

The determination of the type of program is made by comparing the cues identified in the transcript text **(Step 20)** to a look-up table (knowledge database 108) which includes the type of program and the cues which should be present in the particular type program. The type of program which most closely corresponds to the proper temporally located cues (according to temporal database 110) identified in the transcript information is output as the program classification.
